Fetal Bovine Serum (FBS), Collected in South America

Fetal Bovine Serum (FBS) is the most frequently used growth supplement for cell culture media. High levels of embryonic growth promoting factors improve various cell culture applications.

Cat-No:	FBS-12A
Volume:	500 ml
Storage:	≤-15°C
Sterility:	Sterile-filtered

FBS Minis relieve you from the laborious and time-consuming task of aliquoting FBS. Your chosen batch of FBS is filled directly into practical **50-ml bottles**.

FBS ADVANCED

The Smart Solution

FBS Advanced is an excellent alternative to the classic FBS Collected in South America. The special processing during pooling and filtration significantly reduces such batch-to-batch variations in FBS Advanced.

Once successfully tested on a cell line, there is usually no need for further batch testing.

Cat-No: **FBS-11A**
Volume: **500 ml**
Storage: **≤-15°C**
Sterility: **Sterile-filtered**

FBS Minis relieve you from the laborious and time-consuming task of aliquoting FBS. Your chosen batch of FBS is filled directly into practical **50-ml bottles**.
